Management Discussion And Analysis

Economy

The continuing global economic crisis is adding another layer of complexity to an already challenging market environment. India's economic growth began slowing because of a tight monetary policy, intended to address persistent inflation, and a decline in investment caused by investor pessimism about domestic economic reforms and the global situation. To achieve the level of strong economic performance of recent past, the country will require continuing effort to widen the ambit of economic reform, and difficult decisions will have to be taken to deal with the emerging challenges within India and worldwide.

Industry Outlook

Pharmaceutical market research firm, IMS Health forecast that the global spending on medicines annually will grow from about \$956 bn in 2011 to nearly \$1.2 trillion by the year 2016, as the pharmerging markets, biologics and generics contribute a greater share of spending. Developed markets will decline to 57% of global spending due to patent expiries, slower brand spending growth and increased cost containment actions by payers. In next five years, pharmerging markets share of spending will increase by 10% points to 30% of global spending.

IMS Health predicts that North and South America, Europe and Japan will continue to account for a full 85% of the Global pharma market well into the 21st century.

The generic drug market is gaining increasing ground over branded pharmaceuticals, with the FDA reporting that generics account for more than 70% of prescription drugs in the US, according to BCC Research report. The global generic drug market should grow at a CAGR of 15% over 5 years. While US market for generic drugs is forecast to show more than 10% CAGR, reaching \$54, Japan is likely to see over 12% growth to exceed \$9.5 billion in 2014.

With strong presence both within the patented and generic active ingredient segments, your company will continue to support its customers by offering cost competitive and faster delivery structure.

Internal Control systems

The Company maintains a system of well established policies and procedures for internal control of operations and activities, and these are continually reviewed for effectiveness. The internal control system is supported by qualified personnel and a continuous program of internal audit. The prime objective of such audits is to test the adequacy and effectiveness of all internal control systems laid down by the management and to suggest improvements.

We believe that the company's overall system of internal control is adequate given the size and nature of operations and effective implementation of internal control self assessment procedures and ensure compliance to policies, plans and statutory requirements. Effective internal control implies the organization generates reliable financial reporting and substantially complies with the laws and regulations that apply to it.

Divi encourages and recognizes improvements in work practices. The internal control system of the company is also reviewed by the Audit Committee periodically. The Management duly considers and takes appropriate action on the recommendations made by the statutory auditors, internal auditors and the independent Audit Committee. They assess whether the controls are properly designed, implemented and working effectively, and make recommendations on how to improve internal control.

Risks and Concerns

Divi lays emphasis on risk management and has an enterprise-wide approach to risk management, which lays emphasis on identifying and managing key operational and strategic risks. Through this approach, the company strives to identify opportunities that enhance organisational values while managing or mitigating risks that can adversely impact its future performance.

Divi is engaged in manufacture of generic APIs, custom synthesis of active ingredients for innovator companies and other specialty chemicals like peptides and nutraceuticals. The company constantly reviews its policies and procedures to adhere to conformity to the various regulatory approvals for its manufacturing facilities and its commitment to IPR. The company is very selective in its product portfolio with a focus on export markets within the domain of its capabilities and does not transgress in unrelated expansions, diversification or acquisitions.

The company continues its initiatives aimed at assessment and avoidance of various risks affecting its business and towards cost control and efficiency across its businesses and functions, taking appropriate measures and reviewing them from time to time. The company's current and fixed assets as well as products are adequately insured against various risks. Over 77% of sales constitute supplies to regulated markets in Europe and USA and the company devotes significant importance to the regulatory compliances.

The company's risk management and control procedures involve prioritization and continuing assessment of these risks and devise appropriate controls, evaluating and reviewing the control mechanism and redesigning it from time to time in the light of its effectiveness.

Regulatory Filings/Approvals

Divi has triple Certifications ISO-9001 (Quality Systems), ISO-14001 (Environment Management Systems) and OHSAS-18001 (Occupational Health and Safety systems) for its manufacturing facilities and adheres to cGMP and standard operating practices in its manufacturing/operating activities and these certifications are renewed from time to time. All the manufacturing sites have been inspected by US-FDA, barring the recently implemented DSN SEZ Unit which expects an inspection next year.

Increase in inventory of raw materials is due to increased level of operations at the existing units besides commencement of operations at the DSN SEZ. It may also be noted that the company undertakes campaign production of high-volume products like Naproxen and Dextromethorphan by running the plant at full stream and stock these products for sale - thus freeing the multi-purpose plants for producing other products. As the company has a very large market share for these products, we do not foresee any problem with selling these products.

Slow moving and non-moving items have been fully provided for.

Independent Auditor's Report

To

The Members of

DIVI'S LABORATORIES LIMITED

Report on the Financial Statements

We have audited the accompanying financial statements of DIVI'S LABORATORIES LIMITED ("the Company"), which comprise the Balance Sheet as at March 31, 2013, and the Statement of Profit and Loss and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards referred to in sub-section (3C) of section 211 of the Companies Act, 1956 ("The Act"). This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- a. in the case of the Balance Sheet, of the state of affairs of the Company as at March 31, 2013;
- b. in the case of the Statement of Profit and Loss, of the profit for the year ended on that date; and
- c. in the case of the Cash Flow Statement, of the cash flows for the year ended on that date.

Emphasis of Matter

We draw attention to Note No 31(II)(9)(c) regarding investments in wholly owned subsidiaries whose net worth are eroded and the consequent possibility of impairment of the equity investment of Rs. 281.61 lakhs made and non-recovery or partial recovery loans of Rs. 4486.31 lakhs given to them by the company. For reasons explained in the said Note, including the subsidiaries future business plans and growth prospects, such impairment if any is considered to be temporary in nature and no provision is considered necessary in the accounts of the company. Our opinion is not qualified in respect of this matter.

Report on Other Legal and Regulatory Requirements

All assets and liabilities have been classified as current or non-current as per the company's normal operating cycle and other criteria set out in Revised Schedule VI to the Companies Act, 1956. Based on the nature of products and time between acquisition of assets for processing and their realization in cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current/non-current classification of assets and liabilities.
